

LiiOn

- Battery hand welder -

HERZ

NEW

LiiOn

The first professional battery hand welder!

To weld all different kind of thermoplastic materials for roofing, flooring, tarps, plastic fabricating and much more.
With the LiiOn you are no longer depending on having electricity on construction site. You have everything that you need with you. A repair on a roof or a small welding is handled in a heartbeat.

The backpack is included. In the backpack you can store your battery, the charger and the hand welder tool LiiOn.

- Long running time (45 minutes on the highest temperature 600°C)
- Backpack with viewing window
- Display with battery level indicator
- Time saving on repairs
- Low battery signal
- Easy charging
- Standard accessories can be used (nozzles)
- High performance

INCLUDED:

Hand welder, battery, charger, backpack
