

Air heaters & Blowers - Process Heat -

Air heaters and blowers

INNOVATIVE

Versatile due to its modular structure; completely maintenance-free; modern and exceptionally functional design; equipped with electronic heater element and device protection (types S, M, L, XL and Compact)

PRACTICE-ORIENTED

Approved design and dimensions; flexible due to graduated heating capacities and voltages; device protection evaluable with floating contact for the types L and XL; by modifying the basic versions, most applications can be realized.

STRONG SERVICE

Usual service within 24 hours; simple heater element replacement by the user.

Basic version:

1. control (output control) via internal potentiometer, with heater element and device protection
 2. external control via PWM signal (digital control signal: PWM 12 - 24 VDC) via PLC, controller, etc.
 3. without power electronics and without heater element protection; partially with device protection.
- All devices in the series S and M are also available with heater element monitor and error message output.

Available modifications:

(The following modifications will e.g. allow for an internal PID control)

- S01 - external control of the heater via PWM signal (12-24VDC; max. cycle time 1 Hz) incl. 5 meter 2-pole control line
- S02 - external potentiometer for the heater incl. 5 meter 3-pole control line and control knob (red)
- S04 - external control of the blower speed incl. 5m 3-pole control line (only for the type COMPACT) - analogue control signal: 0-10VDC; digital control signal: PWM 12-24VDC; 1-10kHz; I_{max}. 10mA
- S05 - internal PID control of the temperature without visualisation
- S06 - internal thermocouple with 2 meter compensating line
- S07 - separate connection option for heater and blower for type COMPACT (230VAC)
- S08 - pre-set blower speed for type COMPACT
- S09 - integrated digital controller with 2-line display for TARGET and ACTUAL temperature and internal thermocouple (only type COMPACT)
- S10 - additional handle mounted on the back (only type COMPACT)
- S11 - separate connection option for heater and blower; without connection wire (only for type COMPACT 400VAC; 230VAC blower / 400VAC heater)
- S12 - compressed air connection with push-in connector 8/6mm for type S
- S13 - connection for hose 6/4mm for monitoring the pressure in types S and M without electronics
- S15 - compressed air connection with push-in connector 8/6mm for type M
- S16 - fitting M32 for mains cable up to 19mm for the types L and XL
- S17 - mains cable from silicone, permanently soldered on for blow-in air temperatures up to 100°C for the types L and XL without electronics
- S18 - funnel-shaped output opening without kink protection spiral for mains cable (only for type COMPACT without handle)
- S20 - integrated solid state relay for air heater L and XL without electronics for external control with PWM signal 12-24VDC
- S21 - evaluation of the blower speed with 5 meter control line; interface OpenCollector – 2 pulses/cycle – max. 10mA for counter with min. 10,000 input pulses/minute (only type COMPACT)
- S23 - heater element tube without protection tube for all air heaters and COMPACT
- S24 - pre-set heating capacity (only type COMPACT)
- S29 - external potentiometer incl. 5 meter control line and control knob (blue) for blower speed (only type COMPACT)

Type COMPACT

from 2'300 watt
to 6'100 watt

X = 325 mm at 2'300 and 3'700 watt
X = 365 mm at 3'100, 4'700 and 6'100 watt
Y = 125 mm at 2'300 and 3'700 watt
Y = 165 mm at 3'100, 4'700 and 6'100 watt

Unmatched in air volume and pressure with minimum dimensions!

Standard continuous temperature adjustment and an electronic heater element and device protection for this device, as well as continuous speed adjustment for variable air volumes.

Temperature and speed are set with the potentiometer, optionally, both values can be set with an external control (e.g. PLC). Please observe the modification

options listed on page 2 above. A query of the speed for visualisation, control or monitoring the process safety is also possible. Due to its broad accessory range, the device can be used in multiple applications. The small size of 325 x 136 x 180 mm allows for a flexible installation of the COMPACT while saving space. Simple mounting and easy replacement is provided by the six cast metal threads on the bottom.

RiOn BL and ErOn BL

RiOn BL / Rion Digital BL

Part no. 6600185 / 6600188

CE

CE

ErOn BL

Part no. 6600189

The most convenient ones!

The brushless motor will enable maintenance-free continuous operation for these devices in the harshest industrial applications. Therefore, our hot air blowers are perfectly suited for installation in e.g. shrink tunnels and machines where an even hot air stream is important.

Standard version:

- continuous temperature setting via the potentiometer on the device
- integrated heater element and device protection

Special versions:

- external control of the heating operation (digital control signal: PWM 12 - 24 VDC)
- external control of the blower speed (air volume) (only analogous)
- internal thermocouple (RiOn Digital only)
- integrated digital controller with temperature display

Accessories:

- external digital controller (part no. 5202408)

Electr. protection class II			

Type S21

from 435 watt to 800 watt

The one with small heater element!

The S21 is equipped with an internal heater control via a potentiometer by default. The availability of 3 basic versions and several modifications as well as e.g. an internal PID control, the device meets individual requirements.

Article number /	Potentiometer	5101354	5101349	5101351

Type S32

from 700 watt to 2'000 watt

The only one!!

No other air heater provides this capacity range with these small dimensions. For projects where similar devices such as type S21 are too small and type S36 is too big, type S32 fills the existing gap! The availability of 3 basic versions and several modifications as well as e.g. an internal PID control, the device meets individual requirements.

Type L62

from 4'300 watt to 13'000 watt

The slim one!

This device with slim pipe adapter and a maximum temperature of 700°C. The perfect air heater for positions difficult to access. As a standard, the L62 provides an evaluation of the device protection with an internal relay with a changeover contact for 230 volts and max. 1 amp. The availability of 3 basic versions and several modifications as well as e.g. an internal PID control, the device meets individual requirements.

Type XL92

from 5'700 watt to 25'000 watt

The highest capacity!

The perfect choice for the highest capacity and air volume requirements. Capacity up to 25 kW for very large air volumes, packed in a compact air heater. As a standard, the XL92 provides an evaluation of the device protection with an internal relay with a changeover contact for 230 volts and max. 1 amp. The availability of 3 basic versions and several modifications as well as e.g. an internal PID control, the device meets individual requirements.

Typ PH62 / PH 92

from 4'400 watt to 25'000 watt

CE

CE

Heat resistant up to 180°C!

Both devices are equipped with flanges on the inlet and outlet side to integrate them easily into a pipe system. Inlet temperatures of max. 180°C can be supplied at the inlet in recirculated air operation without causing damages. For air supply, our medium-pressure blowers with simple temperature resistor can be used. You can find them on the [pages 18 and 19](#).

The pipe air heaters are designed for a high system pressure of 600,000 Pa (6 bar) and can therefore also be used in closed systems. The air heaters of this type are not equipped with electronics due to the use in recirculated air operation and are therefore without heater element and device protection. Observe the minimum air volume requirement for operation!

Type L62HT / XL92HT

from 11'000 watt to 15'000 watt

Temperatures up to 900°C!

These two air heaters will realise process temperatures in the high temperature range. Their slim design is perfectly suited for confined spaces. The devices are always delivered without electronics; however, they can be equipped optionally with a power unit with the modification S20. Wiring to the load relay in the electric cabinet will not be required.

Type PN10

from 2'300 watt to 21'000 watt

CE

Compressed air up to 10 bar – no problem!

Due to its small size, the gas-tight air heater is very versatile in application.

When one or more devices are connected to the air pressure network, the deliver airflow with high air speed. The temperature can be controlled 100% electronically. The hot air stream can be used for various applications such as drying processes.

Due to its ruggedness, this device is even suited for the harshest environments (e.g. foundries).

The availability of 3 basic versions and several modifications as well as e.g. an internal PID control, the device meets individual requirements.

Air volume	m ³ /min	3,65	4,42
Overall pressure difference	Pa	25'000	26'000
Voltage	VAC	230 - 400	265 - 460
Frequency	Hz	50	60
Power	kW	2,20	2,55
Electricity	A	5,1	
Speed	rpm	2'900	3'500
Noise pressure level	LpA (db)	68,8	70,8
Intake air port Ø	mm	60 mm exterior (IG 2")	
Exhaust opening Ø	mm	60 mm exterior (IG 2")	
Ambient temperature	°C	-20 to +60	
Weight	kg	26,5	
Dimensions (L x B x H)	mm	400 x 330 x 365	
Type of protection		IP54	
Electr. protection class I			

Type MD10

Our medium-pressure blower features:

- high capacity in compact design
- long operating life with low running costs
- excellent efficiency
- good noise behaviour rugged housing design with good flow characteristics
- maintenance-free
- absolutely oil-free
- optionally with UL certification
- optionally with PTC thermistor
- suitable for frequency-converters
- optionally with simple or double temperature resistor for supply temperatures up to 180°C or 230°C

Design		Centrifugal blower	
Article number		5103507	
Air volume	m ³ /min	4,9	5,9
Overall pressure difference	Pa	1'000	1'600
Voltage	VAC	200 - 277 345 - 480	
Frequency	Hz	50	60
Power	kW	0,08	0,140
Electricity	A	0,45 - 0,48 0,26 - 0,28	0,55 - 0,59 0,32 - 0,34
Speed	rpm	2'750	3'120
Noise pressure level	LpA (db)	73	76
Intake air port Ø	mm	70	
Exhaust opening Ø	mm	60 mm exterior	
Ambient temperature	°C	-20 to +60	
Weight	kg	8,5	
Dimensions (L x B x H)	mm	356,5 x 238 x 344,5	
Optional for 1 x 230 VAC		Capacitor 230V; 8 µF (Part no. 5110887)	
Type of protection		IP54	
Electr. protection class I			

Type MD14

CE

A lot of air with the medium-pressure blower MD14!

- high capacity in compact design
- suitable for frequency-converters
- excellent efficiency
- very silent run
- optionally with simple or double temperature resistor for supply temperatures up to 180°C or 230°C
- absolutely oil-free

Design		Centrifugal blower	
Article number		5103527	
Air volume	m ³ /min	16,5	19,5
Overall pressure difference	Pa	1'400	2'000
Voltage	VAC	200 - 277 345 - 480	
Frequency	Hz	50	60
Power	kW	0,37	0,55
Electricity	A	1,55 - 2,60 0,90 - 1,50	2,00 - 2,25 1,15 - 1,30
Speed	rpm	2'825	3'340
Noise pressure level	LpA (db)	73	76
Intake air port Ø	mm	125	
Exhaust opening Ø	mm	90 mm exterior	
Ambient temperature	°C	-20 to +60	
Weight	kg	17,0	
Dimensions (L x B x H)	mm	485 x 378 x 485,5	
Optional for 1 x 230 VAC		Capacitor 230V; 30 µF (Part no. 510353)	
Type of protection		IP54	
Electr. protection class I			

Frequency converter (FC) series

SK75 to 0,75 kW / SK 220 to 2,2 kW

Simple and compact, but powerful in combination with HERZ blowers

- accurate air volume adjustment for your hot air processes
- simple parameterisation
- easy installation
- easy accessible connection clamps with clear labelling
- easy start-up – setting at the touch of a button – no complex programming required
- integrated EMC filter, can be deactivated when required
- operating unit with display by default
- software and documentation CD included by default
- RS485 communication interface
- Modbus RTU as standard protocol
- exceptional power

CE

Type Sk75
Part no. 5117359

CE

Type SK220
Part no. 5117360

Digital controller type ETR4824

Perfect for the control of temperatures with HERZ air heaters

The controller from the series ETR is a versatile PID temperature controller with self-optimisation.

Universal input

The input type can be set: Thermocouple, platinum resistance thermometer, infrared thermometer, analogue control with current and/or voltage.

Installation dimensions

Standard DIN format 1/32 (ETR 48-24), optionally 1/16 (ETR 48-48)

Safety / Certificates

Waterproof front construction (NEMA4X: corresponds to IP66). Meets regulations UL, CSA and IEC and is CE-marked.

Digital communication (optional)

The RS485 interface allows for easy parameterisation via notebook / PC / PLC.

CE

Type ETR4824
Part no. 5202408

Thermocouple type „K“

Thermocouples **type „K“** are reliable and rugged. With a sensor length of approx. 122mm, the probe can also be positioned in inaccessible positions.

The silicone compensating line has a standard length of 2.0m and is equipped with a miniature plug.

The thermocouples comply with DIN 60584, class1.

Airflow monitor type M2 compact (DC)

Type M2 Compact
Part no. 5202110

Optional accessories

Connection adapter 60 mm

Part no. 5107278

Connection adapter 38 mm

Part no. 5107293

!!! Important information!!!

One-part sensor to monitor air and gas flows with integrated evaluation electronics. The device working according to the calorimetric principle provides maintenance-free operation with its teach-in function.

Please note that operation of hot air systems according to VDE 0100 is only admissible when the air supply is monitored reliably. Please observe the FOLLOWING excerpt from VDE 0100, part 420, DIN 57100, section 6.1.1: „Blower-assisted heating systems shall be so installed that their heating elements, except for electric storage heaters, cannot be put into operation until the required air flow has been achieved.“

Analogue - digital converter

Analogue - digital converter 0-10VDC o 4-20mA DC on 24VDC PWM signal

Function:

The signal converter converts the input signal (0-10VDC or 4-20mA DC) in 0-100% pulse width modulation (PWM) with 24VDC output. Vibration package control by pulse width modulation.

Application:

External control of all HERZ air heaters when using an analogue control signal (input 0-10VDC or 4-20mA DC = 0-100% output)

Input 0-10VDC - output 24VDC PWM

Part no. 5202111

Input 4-20mA DC - output 24VDC PWM

Part no. 5202112

Air volume control - manual

Manual air volume controller, Ø 38 mm and 60 mm

Function:

Manual air volume controller to plug on all HERZ high- or medium-pressure blowers.

Installation on the pressure side.

Features:

Rotary drive via rotary knob, rotation angle 90°

Connection plug 38 mm device:

Air intake internal Ø 38 mm

Air outlet external Ø 38 mm

Connection plug 60 mm device:

Air intake internal Ø 60 mm

Air outlet external Ø 60 mm

Special versions:

Connection plug air intake and air outlet → same diameter

Air volume controller manual for 38/40 mm hose

Part no. 5108755

Air volume controller manual for 60/62 mm hose

Part no. 5107295

Air supply cut-off switch - pneumatically

Pneumatic air supply cut-off switch, Ø 38 mm and 60 mm

Function:

Pneumatic air supply cut-off switch to plug on all HERZ high- or medium-pressure blowers.

Features: Pneumatic rotational drive, double-action, rotational angle 90°

Connection plug 38 mm device:

Air intake internal Ø 38 mm

Air outlet external Ø 38 mm

Connection plug 60 mm device:

Air intake internal Ø 60 mm

Air outlet external Ø 60 mm

Special versions:

Connection plug air intake and air outlet → same diameter

Compressed air connection:

2 x compressed air hose Ø 4 mm with push-in plug connection

Pneumatic air supply cut-off switch for 38/40 mm hose

Part no. 5107299

Pneumatic air supply cut-off switch for 60/62 mm hose

Part no. 5107296

Nozzles for COMPACT

5107246

Flanged connection

5107245

Round nozzle Ø 40 mm

5107265

Angled nozzle 90°, Ø 62 mm
side length 120 x 112 mm

5107247

Extension pipe 200 x 40 mm

5107253

Pipe nozzle with longitudinal slots 700 / 550 x 1.7
(pipe length / slot length / slot height -
with cross-pieces)

5107260

Wide slot nozzle 85 x 15 mm

5107259

Wide slot nozzle 150 x 12 mm

5105977

5107263

Wide slot nozzle 200 x 9 mm, part no. 5105977
Wide slot nozzle 250 x 12 mm, part no. 5107263

5107262

5105991

Wide slot nozzle 300 x 4 mm, part no. 5107262
Wide slot nozzle 500 x 4 mm, part no. 5105991

5106177

Flat reflector 400 x 50 mm
connection plug installed off-centre

5107248

Stainless steel filter for the suction side of the
COMPACT

5800134

Connection adapter for the suction side of the
COMPACT for PVC hose Ø 60 mm

Accessories for air heater type XS20

5202406

SSR solid state relay without heat sink 230VAC 12A
(control 12V)

5202407

Heat sink for SSR DIN hat rail

Nozzles for air heater type S21 - S36 and RION BL

5107282
5107283
5207250

Flanged connection for type S21, part no. 5107282
Flanged connection for type S32, part no. 5107283
Flanged connection for type S36, part no. 5207250

5107144
5107145
5100303
5107155

Pipe nozzle Ø 5 mm for type S21, part no. 5107144
Pipe nozzle Ø 10 mm for type S21, part no. 5107145
Pipe nozzle Ø 5 mm for type S32 and Rion, part no. 5100303
Pipe nozzle Ø 5 mm for type S36, part no. 5107155

5105475

Wide slot nozzle 20 x 2 mm for type 32 and Rion

5107132

Wide slot nozzle 40 x 2 mm for type 32 and Rion

5107003

Angled nozzle 90°, Ø 112 mm for type S36

5107251

Extension pipe 210 x 36.5 for type S36

5107261

Wide slot nozzle 70 x 4 mm for type S36

5107324

Spoon-reflector Ø 10 mm for soldering of solder-shrinkage connections and for shrinkage of PVC, PTFE, FEP shrink hoses. Push-fit for pipe nozzle Ø 5 mm for type S21 - S36 and Rion

Nozzles for air heaters type M50, M50L and Eron BL

5107254

Flanged connection for type M50, M50L and Eron

5107256

Angled nozzle 90°, Ø 50 mm, side length 160 x 100 mm for type M50, M50L and Eron

5107255

Extension pipe 160 x 36.5 for type M50, M50L and Eron

5107258

Wide slot nozzle 70 x 10 mm for type M50, M50L and Eron

5107270

Wide slot nozzle 150 x 12 mm for type M50, M50L and Eron

Nozzles for air heaters type L62, L62HT

5107246

Flanged connection

5107245

Round nozzle Ø 40 mm

5107265

Angled nozzle 90°, Ø 62 mm
side length 120 x 112 mm

5107247

Extension pipe 200 x 40 mm

5107253

Pipe nozzle with longitudinal slots 700 / 550 x 1.7
(pipe length / slot length / slot height - with cross-pieces)

5106177

Flat reflector 400 x 50 mm, connection plug installed
off-centre

5107260

Wide slot nozzle 85 x 15 mm, part no. 5107260
Wide slot nozzle 150 x 12 mm, part no. 5107259

5105977

Wide slot nozzle 200 x 9 mm, part no. 5105977
Wide slot nozzle 250 x 12 mm, part no. 5107263
Wide slot nozzle 300 x 4 mm, part no. 5107262
Wide slot nozzle 500 x 4 mm, part no. 5105991

Nozzles for air heaters type XL92, XL92HT

5107275

Flanged connection

510244

Round nozzle Ø 50 mm

5107269

Angled nozzle 90°, Ø 92 mm
side length 175 x 175 mm

5107273

Extension pipe 600 x 60 mm

5107268

Pipe nozzle with longitudinal slots 1280 / 1000 x 1.5
(pipe length / slot length / slot height - with cross-pieces)

5107274

Wide slot nozzle 130 x 17 mm, part no. 5107274
Wide slot nozzle 300 x 12 mm, part no. 5107272

5106018

Wide slot nozzle 400 x 10 mm, part no. 5106018
Wide slot nozzle 500 x 15 mm, part no. 5107267

5106023

Wide slot nozzle 600 x 4 mm

Manifold, hose and various accessories for all blowers
